EDWARD L. IONIDES

Department of Statistics
University of Michigan
453 West Hall
Ann Arbor MI 48109-1107

http://dept.stat.lsa.umich.edu/~ionides
email: ionides@umich.edu

RESEARCH INTERESTS

Time series analysis with applications to public health and the biological sciences. Methodology for inference on partially observed stochastic dynamic systems.

EDUCATION

1995-2001 Ph.D. in Statistics from University of California, Berkeley.

1994-1995 Master of Mathematics (passed with distinction) from Cambridge University.

1991-1994 B.A. in Mathematics (first class) from Cambridge University.

EMPLOYMENT AND PROFESSIONAL EXPERIENCE

2014-present Professor, Department of Statistics, University of Michigan.

2009-2014 Associate Professor, Department of Statistics, University of Michigan.

2002-2009 Assistant Professor, Department of Statistics, University of Michigan.

2001-2002 Visiting Assistant Professor, Department of Statistics, University of Chicago.

WORKING PAPERS

Ning, N. and Ionides, E. L. (2021). Iterated block particle filter for high-dimensional parameter learning: Beating the curse of dimensionality. *arxiv:2110.10745*.

CURRENT GRANTS

2018-2022 *Collaborative research: Urban vector-borne disease transmission demands advances in spatiotemporal statistical inference.*
Role: Lead PI.
Total award: $1,300,000.

2017-2022 *RTG: Understanding dynamic big data with complex structure.*
Role: Co-investigator (PI, Elizaveta Levina).
Total award: $2,500,000.

COMPLETED GRANTS

2014-2019 *Center for Inference and Dynamics of Infectious Diseases.*
NIH (Modeling of Infectious Disease Agent Study, Center of Excellence).
Role: Investigator (PI, Elizabeth Halloran, Fred Hutchinson Cancer Research Center).
Individual award: $624,770, estimated as 5×yr1 expenditure (total $12,000,000).

2014-2019 *Modeling the Effects of the Environment on Enteric Pathogen Dynamics.*
NIH (Modeling of Infectious Disease Agent Study, Project).
Role: Investigator (PI, Joseph Eisenberg)
Individual award: $198,580, estimated as 5×yr1 expenditure (total $2,000,000).

2013-2017 *Iterated filtering: new theory, algorithms and applications.*
NSF (Division of Mathematical Sciences).
Role: Principal Investigator.
Award: $100,000.

2014 *Industry partnership program: Sponsored internships at M-Financial.*
Society of Actuaries.
Role: Co-superviser of undergraduate interns.
Individual award: $15,000.

2012-2014 *Efficient iterated filtering: theory and practice.*
University of Michigan Associate Professor Fund.
Role: Principal Investigator.
Award: $78,039.

2008-2014 *HIV risk dynamics, genetic patterns, and control.*
NIH (R01 from National Institute of Allergy and Infectious Diseases).
Role: Co-Investigator (PI, James Koopman).
Individual award: $49,373 (total $1,621,180).

2013-2014. *Analysis of the Association Between Cell Phone Use and Motor Vehicle Crashes.*
Centers for Disease Control (CDC).
Role: Co-investigator (PI, Ray Bingham).
Individual award: $13,949 (total $100,000).

2012-2013 *The effectiveness of novice teen driver cell phone bans in reducing crashes.*
University of Michigan Injury Center Pilot Study.
Role: Principal Investigator.
Award: $25,000.

2008-2012 *Inference for dynamic systems.*
NSF (Division of Mathematical Sciences).
Role: Principal Investigator.
Award: $200,000.

2009-2012 *Mortality and Macroeconomic Conditions: Differential Vulnerability and Mechanisms.*
NIH (R21 from National Institute of Child Health & Human Development).
Role: Co-Investigator (PI, José Tapia Granados).
Individual award $128,428 (total $400,000).

2008-2012 *Research and Policy in Infectious Disease Dynamics.*
NIH (Intergovernmental Personal Act position with Fogarty International Center).
Role: Principal investigator.
Award: $80,000.

2006-2008 *Vector-transmitted diseases in a changing world: a dynamical perspective.*
Graham Environmental Sustainability Institute.
Role: Co-Investigator (PI, Mercedes Pascual).
Individual award: $32,706 (total $196,292).

2006-2008 *Cortical control using multiple signal modalities.*
NIH (R21 from National Institute of Child Health & Human Development).
Role: Co-Investigator (PI, Daryl Kipke).
Individual award $14,828 (total $333,746).

2004-2008 *Collaborative research: The interplay of extrinsic and intrinsic factors in epidemiological dynamics: Cholera as a case study.*
NSF (Ecology of Infectious Disease).
Role: Co-Principal Investigator (PI, Mercedes Pascual).
Individual award: $165,388 (total $477,577).

EDITORIAL POSITIONS

2013-2015 Associate editor for Electronic Journal of Statistics.

2007-2009 Associate editor for Annals of Statistics.

REFEREE SERVICE

Journal article review: American Journal of Epidemiology, American Mathematical Monthly, American Naturalist, Annals of Applied Statistics, Annals of Statistics, Bernoulli, Biology Letters, Biometrical Journal, Biometrics, BMC Infectious Diseases, Bulletin of Mathematical Biology, Clinical Infectious Diseases, Computational Statistics & Data Analysis, Ecological Monographs, Ecology, Epidemics, Environmental Health Perspectives, European Physical Journal B (Condensed Matter and Complex Systems), Health Economics, Journal of Applied Statistics, Journal of Biological Dynamics, Journal of Biology, Journal of Mathematical Biology, Journal of Multivariate Analysis, Journal of Population Economics, Journal of Statistical Planning and Inference, Journal of the American Statistical Association, Journal of the Royal Society Interface, Journal of the Royal Statistical Society B: Statistical Methodology, Journal of the Royal Statistical Society C: Applied Statistics, Lancet Global Health, Mathematical Biosciences, Nature, Nature Communications, NPJ Digital Media, Oxford Economic Papers, Physica D: Nonlinear Phenomena, PLoS Computational Biology, Proceedings of the National Academy of Sciences of the USA, Proceedings of the Royal Society B: Biological Sciences, Scandinavian Journal of Statistics, Science, Science Advances, Signal Processing, Signal Processing Letters, Statistical Science, Statistics & Computing, Statistics & Probability Letters, Statistics Surveys, Stochastic Environmental Research and

Risk Assessment, Theoretical Population Biology, Wellcome Open Research.

Books and book chapter review: Cambridge University Press, Prentice Hall, Springer-Verlag, Wiley.

Grant proposals review: NSF Computational and Data-Enabled Science and Engineering in Mathematical and Statistical Sciences; NSF Community and Population Ecology; NSF Smart and Connected Health Program; Canadian Statistical Science Institute; Massey Fund, New Zealand; Michigan Institute for Data Science; Michigan Institute for Computational Discovery and Engineering

Tenure and promotion case review: Arizona State University; Cornell University; Fred Hutchinson Cancer Research Center; Ohio State University; Pennsylvania State University; Queen's University, Ontario; University of British Columbia; University of California, Berkeley; University of Toronto, Ontario.

DEPARTMENTAL SERVICE

2014-2021 Director of Undergraduate Programs

2019-2021 Undergraduate Data Science Program Committee, chair

2017-2021 Computing committee, chair

2018-2021 Michigan Student Symposium for Interdisciplinary Statistical Sciences (MISSISS), faculty coordinator

2019-2021 Grade review committee, member

2012-2021 PhD admissions committee

2020 Operations under Covid, member

2020 Teaching under Covid, member

2017-2018 Undergraduate Data Science Program Committee, member

2014-2017 Computing committee, member

2015-2017 Undergraduate research committee, chair

2014-2015, 2016-2018 Undergraduate curriculum committee, chair

2013-2015 Department executive committee

2004-2011, 2013-2016 Undergraduate curriculum committee, member

2012-2017 Undergraduate advisor

2006-2014 PhD qualifying exam committee

2011-2012, 2013-2014 Faculty search committee

2008-2013 Incoming PhD student screening and placement exam committee

2008-2009 Outreach committee

2004-2005 Graduate curriculum committee

2002-2004 Curriculum committee

OTHER PROFESSIONAL SERVICE

2018-2021 Advisory board for EPSRC grant *New Approaches to Bayesian Data Science: Tackling Challenges from the Health Sciences* (PI, Paul Fearnhead).

2019 Instructor for a short course on *Partially observed systems: combining data with science* at University of Michigan.

2015, 2016, 2017, 2018, 2019, 2020 Instructor for a short course on *Simulation-based In-*

ference for Epidemiological Dynamics at the Summer Institute in Statistics and Modeling in Infectious Diseases, University of Washington, Seattle.

2017 External PhD examiner, Department of Statistics, University of British Columbia.

2014 Organizer for BIRS meeting on *Statistics and Nonlinear Dynamics in Biology and Medicine*.

2012 Organizer for NIH-supported workshop on *Simulation-based Inference for Mechanistic Models*.

2010 External PhD examiner, Department of Mathematical Statistics, Lund University, Sweden.

2008-present Developer of R software package `pomp` for inference from Partially Observed Markov Processes, `http://cran.r-project.org`.

2008-2012 Member of RAPIDD (Research and Policy for Infectious Disease Dynamics; a program established by NIH Fogarty International Center and the Department of Homeland Security for improving the capacity to plan and respond to infectious disease threats via mathematical modeling and statistical analysis).

2008 Organizer for an invited session on *Time Series Analysis via Mechanistic Models* at JSM.

2007-2010 Member of National Center for Ecological Analysis and Synthesis (NCEAS) working group on *Inference for Mechanistic Models*, involved four meetings at NCEAS (Santa Barbara) during 2007–2010.

COURSES TAUGHT

University of Michigan: Applied Statistics II (STATS 401), Introduction to Probability (MATH/STATS 425), Analysis of Time Series (STATS 531), Applied Probability and Stochastic Modeling (STATS 620), Graduate proseminar (STATS 810).

University of Chicago: State Space Models (STATS 333), Linear Models and Experimental Design (STATS 222), Statistical Methods and their Applications (STATS 220).

PHD STUDENTS

Kidus Asfaw. *Simulation-based Inference for Partially Observed Markov Process Models with Spatial Coupling* (2021). Jointly supervised with Aaron King.

Timothy Necamp. *Design and Analysis of Sequential Randomized Trials with Applications to Mental Health and Online Education* (2019). Jointly supervised with Zhenke Wu.

Joon Ha Park. *Computational Inference Algorithms for Spatiotemporal Processes and Other Complex Models* (2018).

R. Alexander Smith. *Inference of infectious disease dynamics from genetic data via Sequential Monte Carlo* (2018). Jointly supervised with Aaron King.

Dao Nguyen. *Iterated filtering and smoothing with application to infectious disease models* (2016).

Zhen Wang. *Topics in time series analysis with macroeconomic applications* (2012).

Anindya Bhadra. *Time series analysis for nonlinear dynamical systems with applications to modeling of infectious diseases* (2010).

Carles Bretó. *Statistical inference for nonlinear dynamical systems* (2007).

POSTDOCTORAL FELLOWS

Brandon Legried (Current). NSF trainee on *Understanding dynamic big data with complex structure*, working on inferring population dynamics from genetic sequence data.

Patricia (Ning) Ning (Current). NSF/NIH funded project on *Urban vector-borne disease transmission demands advances in spatiotemporal statistical inference*.

Qianying Lin (Current). Michigan Institute for Data Science Institute fellowship on *Phylodynamic inference with applications to epidemiology*. Current. Jointly supervised with Aaron King.

Kevin Bakker (2018-2020). NIH postdoctoral fellowship on *Uncovering the Mechanisms Driving Seasonal Polio Incidence: A Modeling Approach Towards Endgame Strategies*. Jointly supervised with Mercedes Pascual. Now Assistant Research Scientist at University of Michigan.

Carles Bretó (2015-2018). NIH-funded project on *X-Raying High-Dimensional Infectious disease* as part of the Center for Inference and Dynamics of Infectious Diseases . Jointly supervised with Aaron King. Now Assistant Professor of Economics at University of Valencia, Spain.

John Marino (2015-2016). NSF postdoctoral fellowship on *Enhancement of ecological inference and forecasting, with applications to critical threats facing Great Lakes fisheries*. Jointly supervised with Scott Peacor. Now Assistant Professor of Biology at Bradley University.

Isabella Gierlinger and William Smith. Inference from viral genomes. Research project (2019).

Xiaotong Yang. *Fitting mechanistic models to Daphnia panel data within a panelPOMP framework*, honors thesis (2018).

Yichen Zhang. *Environmental drivers of diarrheal infection*, summer project (2017).

Haoran Chen. *Epidemiological time series analysis*, summer project (2017).

Rebecca Mukena Yumba. *Poliovirus Transmission Between Children, Teenagers and Adults: A Partially Observed Markov Process Analysis* (2016).

Hwanwoo Kim. *Topics in design and analysis of clinical trials for adaptive treatment plans* (2015). Winner of the departmental honors thesis award, and 2nd prize winner in the national Undergraduate Statistics Project Competition.

Xi Wu and Kelly Schmidt. *Identification of insurance companies at risk of insolvency* (2014).

Cong Zhang. *Investigating sequential Monte Carlo methods for time series analysis* (2012).

Xiaoai Chai. *Building POMP objects in R for a dynamic general stochastic equilibrium model* (2011).

Murat Ahmed. *Modeling cholera as a stochastic process* (2005).

PROFESSIONAL ORGANIZATIONS

American Association for the Advancement of Science (elected fellow).

International Statistical Institute (elected member).

Institute of Mathematical Statistics.

American Statistical Association.

SEMINARS, PRESENTATIONS AND WORKSHOPS

2021 University of Warwick, Algorithms & Computationally Intensive Inference seminar.

2021 Chalmers University of Technology / University of Gothenburg, Statistics seminar.

2021 JSM, online, speaker in invited session on *High-Dimensional Parameter Learning on Spatio-Temporal Hidden Markov Models and Its Applications in Epidemiology.*

2020 Workshop on *Mathematical modeling and statistical analysis of infectious disease outbreaks*, Centre International de Rencontres Mathématiques, Luminy, France; invited speaker.

2020 University of Michigan, Statistics department seminar.

2019 Workshop on *Bayes for Health*, Lancaster, UK; invited speaker.

2019 Los Alamos National Laboratories, Center for Nonlinear Studies seminar.

2019 Ohio State University, Statistics department seminar.

2018 Workshop on *Future challenges in statistical scalability*, Isaac Newton Institute, Cambridge, UK; invited speaker.

2018 Workshop on *Design and Analysis of Infectious Disease Studies*, Mathematisches Forschungsinstitut Oberwolfach, Germany; invited speaker.

2017 Workshop on *New Perspective on State Space Models*, Casa Matemática Oaxaca, Mexico; invited speaker.

2017 JSM, Baltimore, speaker in invited session on *Advances in Spatio-Temporal Epidemiology.*

2017 University of Chicago, presentation to the Pascual and Cobey groups, Department of Ecology & Evolution.

2017 Series of six guest lectures at University of Pennsylvania, Department of Statistics, on *Likelihood-based inference for dynamic systems.*

2016 Harvard University, Statistics department seminar.

2015 London School of Hygiene and Tropical Medicine, Centre for the Mathematical Modelling of Infectious Diseases seminar.

2015 French National Institute for Agricultural Research, Research Unit in Applied Mathematics and Computer Science seminar.

2015 8th International Conference of the ERCIM WG on Computational and Methodological Statistics, London, UK; invited speaker.

2015 Workshop on *Silent Circulation during the Polio Eradication Endgame*, University of Washington, Seattle; invited participant.

2014 Workshop on *Advancing Software for Ecological Forecasting*, at the National Centre for Supercomputing Applications, University of Illinois at Urbana-Champaign; invited participant.

2014 ENAR, Baltimore; invited speaker.

2013 Workshop on *Design and Analysis of Infectious Disease Studies*, Mathematisches Forschungsinstitut Oberwolfach, Germany; invited participant.

2013 European Meeting of Statisticians, Budapest, Hungary; contributed speaker.

2013 Midwest Statistics Research Conference, University of Wisconsin, Madison; invited speaker.

2013 Research and Policy in Infectious Disease Dynamics and Emerging Pathogens Institute workshop on *Survival Analysis and Phylogenetics in Infectious Disease Epidemiology*, University of Florida; invited participant.

2013 University of Michigan, Epidemiology department seminar.

2012 JSM, San Diego; discussant for invited session.

2012 University of California, Davis, Statistics Department seminar.

2012 Mathematical Biology Institute workshop on *Statistical Inference for Mathematical Biology*, at Ohio State University; plenary speaker.

2012 Research and Policy in Infectious Disease Dynamics meeting, Washington DC; annual convocation.

2011 University of Michigan, Industrial and Operations Research department seminar.

2011 University of Michigan, Ecological Theory Group seminar.

2011 Research and Policy in Infectious Disease Dynamics meeting, Washington DC; annual convocation.

2010 IMS annual meeting, Gothenburg, Sweden; invited speaker.

2010 Research and Policy in Infectious Disease Dynamics meeting, Washington DC; annual convocation.

2009 Harvard University, Epidemiology of Infectious Diseases seminar.

2009 Midwest Statistics Research Conference, University of Chicago; invited speaker.

2009 University of Michigan, Center for Computational Medicine and Biology seminar.

2008 Duke University, Computational Biology & Bioinformatics seminar.

2008 Workshop on *Sequential Monte Carlo methods* at SAMSI, North Carolina; invited discussant.

2008 University of Cambridge Department of Engineering, Signal Processing group seminar.

2008 University of Cambridge Department of Applied Mathematics and Mathematical Physics, Mathematical Biology group seminar.

2008 Columbia University, Statistics department seminar.

2008 Pennsylvania State University, Center for Infectious Disease Dynamics, workshop on *Epidemic model hierarchies and model validation*; invited speaker.

2007 University of St Andrews, seminar for National Centre for Statistical Ecology,

2007 Cornell University, Statistics department seminar.

2007 Wayne State University, Probability and Statistics group seminar.

2007 Workshop on *Statistical Methods for Modeling Dynamic Systems*, Montreal; invited speaker.

2007 University of Cambridge, Statistics group seminar.

2007 University of Oxford, Statistics department seminar.

2007 Pennsylvania State University, Statistics department seminar.

2007 Pennsylvania State University, Center for Infectious Disease Dynamics seminar.

2007 University of Pittsburgh, Mathematical Biology group seminar.

2006 University of Michigan, Statistics department seminar.

2006 SIAM / Society for Mathematical Biology annual meeting, Raleigh, North Carolina; invited minisymposium speaker.

2006 Northwestern University, Biostatistics department seminar.

2005 Carnegie Mellon University, Statistics department seminar.

2005 NSF workshop on Ecology of Infectious Diseases at Washington, D.C.; poster presentation.

2005 Montreal statistics colloquium speaker (CRM-ISM-GERAD).

2004 Joint Statistical Meetings at Toronto; contributed presentation.

2004 IMS/Bernoulli Society meeting at Barcelona; contributed presentation.

2004 University of Western Ontario, Statistics department seminar.

2004 NSF workshop on Ecology of Infectious Diseases at Arlington, VA; participant.

2004 Workshop on Statistical Analysis of Neuronal Data at Pittsburg, PA; participant.

2003 Workshop on Point Processes - Theory and Applications, Banff International Research Station; invited speaker.

2002 University of Michigan, Statistics department seminar.

2002 University of Chicago Graduate School of Business, Econometrics and Statistics seminar.

2001 University of California, Los Angeles, Statistics department seminar.

2001 University of Chicago, Statistics department seminar.

2000 University of California, Berkeley, Statistics department Neyman seminar.
